

Claims 11-20 are pending in this application, with Claim 11 being the sole independent claim. Original Claims 1-10 and 21-37 have been cancelled without prejudice or disclaimer

Claim 11 has been amended to improve its form. Claim 20 has been amended to make its preamble conform to that of the claim from which it depends and to improve its form. It is submitted that neither of these amendments narrows the scope of the claim.

The specification has been amended to improve its grammatical and idiomatic form. These corrections were also made in Application No. 08/518,171, the parent of the '990 application. The specification also has been amended to set forth the related application information for this divisional application.

It is submitted that no new matter has been added by the amendments herein.

Consideration and an early allowance are respectfully solicited.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

Attorney for Applicants

Registration No. 30,938

VERSION WITH MARKINGS TO SHOW CHANGES MADE TO THE SPECIFICATION

The paragraph starting at page 8, line 7 and ending at line 16 has been amended as follows:

In a case that the maximum specular glossiness can be obtained [abtained] at an incident light angle of 60° or more, it cannot be observed visually unless it is viewed at an oblique angle. Also, in a case that the specular glossiness is lower than 100% throughout the all measurement angle, the glossiness is felt to be insufficient as a whole similarly as conventional glossy paper sheets. Furthermore, the recording medium is observed usually at a right angle rather than at an oblique angle.

Table 1 on page 23 has been amended as follows:

Table 1

	Base material	Ink-receiving layer material
<u>Example</u>		
2	Sample Daicho No. 03 (Murata Gold Foil K.K.)	Same as in Example 1
3	Sample Daicho No. 75 [(Murata) Murata Gold Foil K.K.)	Same as in Example 1
4	Sample Daicho No. 101 (Murata Gold Foil K.K.)	Same as in Example 1
5	Sample Daicho No. 109 (Murata Gold Foil K.K.)	Same as in Example 1
6	3D ILLUSION PAPER (AD STICKER)	Same as in Example 1
7	Same as in Example 1	Polyvinylacetal (KW-1, Sekisui Chem. Co.)
8	Same as in Example 1	Hydroxyethylcellulose (Al-15, Fuji Chemical K.K.)
9	Same as in Example 1	Cation-modified polyvinyl alcohol (CM-318, Kuraray Co.)
10	Bone-white colored PET film (Bone-White Lumirror 100E20 Toray Ind. Inc., 100 μ m thick)	Mixture of 100 parts of Polyvinyl alcohol (PVA-217, Kuraray) and 10 parts of Rainblow Piece (No. 608G, Kurachi K.K.)

(continued)--

The paragraph starting at page 25, line 15 and ending at line 22 has been amended as follows:

Similar to (1), specular glossinesses at solid printed areas of yellow, magenta [magent] and cyan colors were measured each at measuring angles of 20°, 45°, 60° and 75° according to JIS-Z-8741. The average values of each five measured values were taken for the specular glossiness at each measuring angles. The maximum specular glossiness and its measuring angle of each color are shown in Table 2.

Table 6 on page 44 has been amended as follows:

Table 6

Example No.	Maximum specular glossiness at a printed area					
	Cyan		Magenta [Magenta]		Yellow	
	Specular glossiness	Angle (°)	Specular glossiness	Angle (°)	Specular glossiness	Angle (°)
27	>370	20	360.2	45	>370	20
28	298.6	45	280.0	45	308.4	45
29	276.3	45	272.3	60	291.4	45
30	216.4	45	220.0	45	230.7	45
31	222.6	60	218.7	60	226.4	45
32	306.4	45	291.5	60	330.6	45
33	353.4	45	333.3	45	>370	20
34	>370	20	345.2	45	>370	20
35	311.0	45	307.2	45	321.3	45
36	>370	20	343.2	45	>370	20
37	302.1	45	294.7	45	312.4	45
38	358.3	45	341.3	45	>370	20
39	298.6	45	291.8	45	305.6	60
40	248.2	45	240.3	45	265.1	45

VERSION WITH MARKINGS TO SHOW CHANGES MADE TO THE CLAIMS

11. (Amended) A printed matter printed with ink dots on a recording medium comprising an ink-receiving layer provided on at least one face of a base material, wherein at least one of solid printed areas of yellow, magenta, and cyan colors has [the] maximum specular glossiness within a measurement angle range of from 20° to 60°.

20. (Amended) The printed matter [recording medium] according to claim 11, wherein a releasable adhesive layer is provided on the face of the base material reverse to the ink-receiving layer.
